MISSION
Help Florida communities deliver high-quality experiences to visitors.

VISION
The Florida Scenic Highways Program promotes economic development, enhances quality of life, and conserves important resources.
The Florida Department of Transportation welcomes the Martin Grade Scenic Highway as the state’s twenty-fifth designated Florida Scenic Highway. There are now over 1,500 miles of scenic highways in thirty counties, including at least one in every FDOT District.

Five Florida routes are also designated as National Scenic Byways and one as an All-American Road by the U.S. Secretary of Transportation. Since the program was launched in 1996, the Florida Scenic Highways collection has grown to become one of the finest and most extensive in the nation.

The program is one of the Department’s most remarkable, and we’re proud of the impact it’s having on the economy, environment, and quality of life in Florida communities. In 2014, more than forty scenic highway projects were completed. We applaud the grassroots byway organizations that work tirelessly to make these projects and this program a success. These groups are outstanding stewards, and demonstrate extraordinary passion for real places and real stories.

We invite you to read more about their accomplishments in the pages of this report. Learn about the only place in Florida where you have to look down to bird watch, where there’s a waiting list for heritage bus tours, and where your 5K finish will be rewarded with homemade pastries. And if you want to know more, we encourage you to visit their websites, follow them on social media, and most importantly, experience a Florida Scenic Highway!
Program Activity

The purpose of the Florida Scenic Highways Program (FSHP) is to designate roads in order to help preserve and enhance the cultural, historic, archaeological, recreational, natural, and scenic resources that lie within the roadway corridor. Florida communities also take advantage of scenic highway designation to improve local quality of life and enhance the experience of byway travelers.

The Florida Department of Transportation (FDOT) launched the program in 1996, and manages the FSHP with program staff supported by District Scenic Highway Coordinators in each of FDOT’s eight Districts. The Scenic Highway Advisory Committee (SHAC) works in cooperation with program staff to strengthen program applications and management plans, and assist in policy development. A full listing of District Scenic Highway Coordinators and Scenic Highway Advisory Committee members can be found on the inside back cover of this report.

Program activity in 2014 included the review and approval of three applications to extend existing scenic highways. Applications from the Green Mountain Scenic Byway, the Indian River Lagoon National Scenic Byway, and Scenic Highway 30-A all provided compelling evidence that the route extensions are consistent in quality to the existing byways, and possess resources that will enhance the scenic highway and the overall visitor experience.

The Indian River Lagoon National Scenic Byway was extended thirty-eight miles to the north in 2014. The extension begins in the City of Titusville and encircles the northern end of the Indian River Lagoon.

Draper Lake is located on Scenic Highway 30-A in the Florida panhandle. A five-mile extension was added to this scenic highway in 2014.

The Byway Buzz newsletter is published quarterly by volunteer Joan Bernat, and features program updates, byway stories, and events from across the state.
Program Activity

The final document review was also completed in 2014 to designate Florida’s twenty-fifth byway, the Martin Grade Scenic Highway. Officially, the route is Martin Highway, County Road 714, but the locals simply call it “The Grade.” This historic twelve-mile road is shaded by a canopy of hundred-year-old oaks, and is surrounded by pastures, groves, swamps, and woods, just as it was when it was carved out of the wilderness by the region’s earliest settlers.

Program staff and the SHAC also reviewed and commented on corridor management plan updates submitted for the Broward A1A Scenic Highway, the Pensacola Scenic Bluffs Highway, and Scenic Highway 30-A.

Although these plans do not require program approval, comments and suggestions were offered to help improve the effectiveness of the documents as tools for the byway organizations.

The Martin Grade Scenic Highway is Florida’s twenty-fifth scenic highway. It is located in western Martin County between Lake Okeechobee and the Atlantic Ocean.

The Great Florida Birding and Wildlife Trail is located on the northern extension of the Indian River Lagoon National Scenic Byway.
Program Activity

The Program office routinely responded to information requests generated by the Florida Scenic Highways website (www.FloridaScenicHighways.com) throughout the year.

Of these requests, approximately eighty percent were domestic inquiries, and the remainder international. Most were seeking suggestions for off-the-beaten-path driving routes, local attractions, and unique experiences. Many requested a map of Florida’s scenic highways.

In addition to the website, program staff also maintained a Facebook page, and more recently, a Twitter account for the FSHP.

Although the program’s number of social media followers has been growing steadily, rapid growth is anticipated due to proposed changes in the Program’s social media strategy.

Another focus of Program activity in 2014 was collecting feedback from scenic highway partners and communities about needed revisions to FSHP policy. The purpose of the policy update is to develop requirements that focus more on supporting economic development, protecting resources, and improving local quality of life.

Feedback was collected via surveys and a day-long discussion forum in Orlando for all scenic highway supporters. Overall, there was consensus that the FSHP designation process should be streamlined, and that post-designation program requirements (like the byway annual report) should be more meaningful.

The revised program requirements will be completed in 2015, and will usher in a new era for the Florida Scenic Highways Program.
Participation in the Florida Scenic Highways Program is entirely voluntary. Citizen groups seek designation to help promote and protect important resources, as well as implement projects that improve local quality of life and enhance the experience of travelers. The remainder of this report focuses on the accomplishments of the dedicated groups that work tirelessly to make this program a success—the byway organizations. The project information and photographs included were provided by these grassroots groups who are outstanding stewards of their special places, and demonstrate extraordinary passion for real places and real stories.

The incredible commitment and volunteer spirit of byway organizations is evident in the over forty-five scenic highway projects completed in 2014. These special projects generated an investment of over four million dollars in Florida communities. While some were physical projects like landscaping, interpretive kiosks, and trailheads, others were programs like litter cleanups, bus tours, or guided trail walks. Many of these projects are featured in the Scenic Highway Milestones section of this report.

**Keys Litter Pick Up** The passion of byway volunteers is always evident—even when collecting litter! Members of the Florida Keys Scenic Corridor Alliance participate in multiple litter control programs including Adopt-A-Highway.

**Guided trail walks** are a program of the Ormond Scenic Loop & Trail. The walks are free of charge and guided by a local biologist.

**Byway organizations** are responsible for the long-term implementation of scenic highway management plans. The Scenic Sumter Heritage Byway organization uses local festivals and events to recruit new volunteers.
Real Places. Real Stories. Real People.

Although byway organizations are all unique, common themes emerge in their work. One of the most common is participation in litter control and prevention programs. The Friends of A1A took part in an International Coastal Cleanup event in September 2014. Eighty volunteers collected two hundred thirty-three pounds of trash along the eleven-mile section of the byway in Flagler Beach.

The Pensacola Scenic Bluffs Highway, Palma Sola Scenic Byway, and Scenic Sumter Heritage Byway organizations all participated in litter clean ups in 2014, and the Florida Keys Scenic Corridor Alliance not only participated, but set a goal of having all one hundred six miles of the byway adopted in the Adopt-a-Highway program. Litter-free communities directly benefit residents and visitors, as well as local businesses.

The Scenic Sumter Heritage Byway organization participates in quarterly cleanups of the two miles leading to the entrance of the Florida National Cemetery.

The Pensacola Scenic Bluffs Foundation sponsored a byway cleanup day in October 2014.

The Friends of A1A partnered with other community organizations including the Hammock Community Conservation Committee, Matanzas High School Key Club, and Keepers of the Coast for the International Coastal Cleanup held on the byway in September 2014.
Several byway organizations were also actively engaged in invasive and exotic species removal. Byway supporters in the Hammock community on the A1A Scenic & Historic Coastal Byway recruit volunteers by proclaiming, “All you need is a pair of gloves, boots, and a pair of loppers if possible!”

Other byways reporting similar activities are the Bradenton Beach Scenic Byway, Palma Sola Scenic Byway, and the Suncoast Scenic Parkway. Plants frequently targeted for removal or replacement are the Brazilian pepper-tree, Australian pine, and Senegal date palms.
Most byway organizations in Florida are all-volunteer. These grassroots groups are supported in a variety of ways by local governments, tourism bureaus, businesses, and individuals. In 2014, byways increased emphasis on identifying new sources of funding and recruiting volunteers.

With sufficient manpower, it is possible to complete new projects and new programs. Many byway organizations have realized that an effective way to increase their capacity is to partner with other groups. Below are several examples of how byway organizations used partnerships in 2014 to benefit byway communities:

- **The Florida Black Bear National Scenic Byway** organization formed a three-MPO partnership (Ocala-Marion, Volusia, and Lake-Sumter) that will sponsor the State Road 40 multi-use trail. This is the last segment needed to complete the three-hundred-fifty-mile “Heart of Florida” Loop Trail in Central Florida.

- **The Florida Keys Scenic Corridor Alliance** supported efforts of the Friends of Old Seven as they sought funding to complete needed repairs to the Old Seven Mile Bridge from Marathon to Pidgeon Key.

- **The J.C. Penney Memorial Scenic Highway** organization assisted the Penney Retirement Community with their Friends and Family Weekend in March 2014, and the byway’s volunteer coordinator assisted the Town of Penney Farms with a successful grant to renovate the public tennis courts. In turn, the retirement community underwrote the design of the byway’s 5K-run tee-shirts.

- **The Pensacola Bluffs Scenic Highway Foundation** assisted Pensacola City Parks with the Day of Caring for United Way by providing volunteers.
Real Places. Real Stories. Real People.

Funding for byway organizations remains very complex. Without a dedicated source of state or national funding for byway projects or byway administration, byway groups must be innovative and resourceful. Many byway organizations are diversifying their sources of revenue, and several byways reported funding success stories in 2014:

- The **2014 Spoonbills & Sprockets Cycling Tour** held by the Friends of A1A was the most successful to date. For the first time, custom-designed cycling jerseys were available by pre-order and at the event. The signature jerseys are very distinctive, and were a huge hit with cyclists. Jersey sales significantly increased the total amount of money raised by the event.

- The **Broward A1A Scenic Highway** brokered an agreement to have the ten municipalities along the byway jointly fund the development of the byway’s corridor management plan update. A total of $38,000 was collected for this important project.

- **Lake County** signed a three-year, $5,000 per year sponsorship agreement with the Florida Black Bear National Scenic Byway. The byway organization’s goal is to have all four counties on the byway sign similar agreements, and will use the funding for byway programs like their mobile app.

- The **Ormond Scenic Loop & Trail** organization received a $1,000 donation from a single private donor to support the construction of the Red Trail observation platform currently underway. The donor follows the activities of the organization, and has participated in one of the byway’s popular guided trail walks.

- The **William Bartram Scenic & Historic Highway** held a successful antique appraisal and bake sale event that required minimal overhead and met fundraising goals.
Real Places. Real Stories. Real People.

FSHP staff are currently researching reliable models to measure the direct economic impact of scenic highway designation. At the same time, byway organizations are being encouraged to identify alternative ways to measure success. The following are examples of how byway organizations have been able to document the impact of previously completed projects:

- Representatives of the J.C. Penney Memorial Scenic Highway participated in an update of the Town Comprehensive Plan in 2010. Zoning changes made then have protected the interests of the scenic highway, and developers now make every effort to work in partnership with the byway organization to ensure the preservation of trees and other resources.

- The Pensacola Bluffs Scenic Highway Foundation was a partner in developing a plan to control erosion along the bluffs and methods to eradicate and replace invasive plants. The guidelines adopted with this plan are now used for all clearing projects along the bluffs.

- Members of the Ormond Scenic Loop & Trail organization have observed an increase in visitor use at two previously completed project sites: Summer Pond observation platform and trailhead sign, and the Boardman Pond trailhead sign.

- Bollards were installed at the Palma Sola Causeway in 2008 to prevent cars from being driven onto the shoreline and washing sand into the bay or Intracoastal Waterway. The bollards still allow access to the shore for boaters, anglers and other users, but the informal parking is no longer uncontrolled, and further erosion is being prevented.

- The Friends of Scenic 30-A were strong advocates for the construction of a pedestrian bridge over Western Lake. The bridge has made significant safety improvements for bicyclists and pedestrians traveling the corridor.

- The Town of Dundee on The Ridge Scenic Highway hosts numerous annual events and has noted increased community pride and higher attendance at events since designation.

- The Florida Keys Scenic Corridor Alliance constructed four informational kiosks in 2010 at four different locations. Actual visitor counts at the kiosk locations have increased yearly.

It is clear that scenic highway designation is having a positive impact on Florida communities. The following Scenic Highway Milestones section highlights additional success stories and accomplishments of Florida Scenic Highway organizations in 2014.
**A1A Scenic & Historic Coastal Byway**

The Friends of A1A continue to excel at hosting successful fundraisers and special events that create greater awareness of the scenic highway and educate the community about fragile resources. In 2014, over two hundred students from St. Johns County public schools participated in Kids Ocean Day where they engaged in activities designed to spark an interest in the environment and a love of conservation.

Despite record-cold temperatures, the Spoonbills and Sprockets Cycling Tour in November 2014 was the most successful with two hundred thirty riders.

The byway organization also converted its existing cell phone tour to a free mobile app which expands the number of photos, videos and story lines that can be easily accessed by visitors to the byway. This conversion actually reduced the operating costs of this important visitor trip planning tool by fifty percent.

---

**Big Bend Scenic Byway**

The Big Bend Scenic Byway organization committed all of its resources in 2014 to completing the Wayshowing and Interpretive Plan for the two-hundred-twenty-mile byway. This all-volunteer group held meetings and conducted site visits with engineers and state and local government officials to develop every detail of the plan, including the location of kiosks, displays, and portal signage. The purpose of this massive project is to enhance the experience of the byway traveler, and improve the scenic highway's brand recognition. It is anticipated that the installation of wayshowing elements will begin in 2015.

[www.floridabigbendscenicbyway.com](http://www.floridabigbendscenicbyway.com)  
Florida Senate District(s): 3  
Florida House of Representatives District(s): 7, 8, 9
Bradentont Beach Scenic Highway

A primary goal of the Bradentont Beach Scenic Highway organization is to protect and enhance the natural features of the byway. The replanting of an existing roundabout and adjacent traffic islands on the scenic highway at the intersection of Bridge Street provided an opportunity to make aesthetic and safety improvements. The roundabout was originally planted with an exotic Phoenix reclinata palm and the usual exotic groundcovers. Disease and storms in the ensuing years steadily reduced the vegetation until nothing remained but an unhealthy remnant of the palm. The roundabout was replanted with native vegetation as an Arbor Day project in 2014. Exotic palms were also replaced with native landscaping in a second roundabout on Bridge Street near the byway. The roundabouts complement each other and add economic and environmental value for the many merchants and patrons on Bridge Street.

Broward County A1A Scenic Byway

All ten of the municipalities along the Broward County A1A Scenic Byway contributed funding to support two major byway projects in 2014. The first was an update of the byway’s corridor management plan. Public meetings were held to collect input on the plan, and several themes emerged including reducing sign clutter, improving safety, and promoting the history of the area. These issues were incorporated into the revised goals, objectives and strategies.

The second project funded by the ten-member collaboration was the development of a website for the scenic highway. The site is hosted by the Greater Fort Lauderdale Convention and Visitors Bureau. An interesting feature of the website is the “Getting Around” section that provides information about alternative forms of transportation available along the byway including bike rentals, trolleys, free shuttles, and rickshaws.

www.sunny.org/scenichighway/
Courtney Campbell Scenic Highway

The Courtney Campbell Scenic Highway organization continues to work closely with its outstanding partner organizations. In 2014, two noteworthy projects were completed by partners that include FDOT, the cities of Tampa and Clearwater, Hillsborough and Pinellas counties, the Tampa Bay Regional Planning Council and the Westshore Alliance. The FDOT funded and installed over eight hundred palm trees along a five-mile stretch of the byway from the Pinellas/Hillsborough county line to Rocky Point Drive.

The City of Tampa, in partnership with Keep Tampa Bay Beautiful, created a sand dune along the shoreline west of the public beach area and installed interpretive signage, a bike repair station for the Courtney Campbell Trail, and native vegetation. These projects not only enhance the byway visitor experience, but also impact the quality of life for drivers who use the road every day, and local residents who take advantage of the recreational opportunities along the byway.

Florida House of Representatives District(s): 60, 67

Florida Black Bear National Scenic Byway

In 2014, the Friends of the Florida Black Bear National Scenic Byway was instrumental in forming a partnership that will develop an eight-mile, shared-use, paved trail along State Road 40. This trail segment will complete the three-hundred-fifty-mile “Heart of Florida” Loop Trail in central Florida. Sections of the trail will use old rail corridors, and there are plans to recreate some of the old rail stations and stops to help tell the story of transportation modes within the corridor.

Florida House of Representatives District(s): 19, 23, 24, 25, 26, 31

The Florida Black Bear National Scenic Byway now has a permanent exhibit at the Barberville Pioneer Settlement that includes an HD video display with an interpretive frame looping the 40-minute FBBSB video.

This panel illustrates the interpretation of transportation modes planned for the State Road 40 multi-use trail project.
Florida Keys Scenic Highway All-American Road

The Florida Keys Scenic Corridor Alliance devoted a significant amount of time in 2014 to updating the byway’s corridor management plan. The Alliance used this opportunity to review previous accomplishments and develop challenging but realistic goals for the future. Brand awareness of Florida’s only All-American Road will be an emphasis moving forward for the organization.

The Florida Keys Scenic Highway serves as the sole means of highway travel for residents and visitors alike, and the Alliance is committed to serving as an advocate for highway safety. The Florida Department of Transportation’s “Put It Down” safety campaign stresses the importance of driver safety through reduction of driver distractions. This program is fully supported by the Alliance who consistently promotes highway safety programs to their members and social media followers.

Green Mountain Scenic Byway

An idea first doodled on a cocktail napkin became a reality in October 2014, when the Green Mountain Scenic Overlook and Trailhead opened to the public. The three-story overlook structure is perched on the side of a hill overlooking Lake Apopka and twenty thousand acres of wetlands. This location on the North Shore of Lake Apopka is one of the best birding sites in North America, with over three hundred fifty indigenous species recorded. This site on the Green Mountain Scenic Byway will now be the primary access point to the North Shore Restoration Area for hikers, cyclists, and bird watchers. The overlook brings attention to the area’s scenic beauty, mountain-like topography and abundant wildlife while creating a sustainable ecotourism-based impact to the local area and the county as a whole.

A northern extension of the Green Mountain Scenic Byway was also approved in May 2014. The scenic highway now links the historic downtowns of Winter Garden and Mount Dora.

www.greenmountainbyway.org
Florida Senate District(s): 11, 12
Florida House of Representatives District(s): 32, 44
Heritage Crossroads: Miles of History

The Heritage Crossroads: Miles of History byway organization worked with partners on two important programs in 2014. The Flagler County Historical Society conducted heritage bus tours along the ninety-two miles of the scenic highway, using the byway guide developed and provided by the byway organization. These tours are held twice a month, and because of demand, reservations are required and there is a waiting list! Byway leaders believe that the demand for these tours is a strong indication of the growing interest in the byway and the region's heritage.

The byway organization was also a major event sponsor of the Flagler County Chamber of Commerce's Creekside Festival. Like the bus tours, this event brings people together to celebrate the history and culture of Flagler County.

www.heritagecrossroads.org
Florida Senate District(s): 6
Florida House of Representatives District(s): 24

Indian River Lagoon National Scenic Byway

The Indian River Lagoon National Scenic Byway was extended thirty-eight miles to the north in 2014. The extension begins in the City of Titusville and encircles the northern end of the Indian River Lagoon. It includes the last major undeveloped area along the east coast of Florida, as well as the exceptional environmental resources of the Merritt Island National Wildlife Refuge, Canaveral National Seashore, and the sparsely developed northern reaches of the Lagoon. These resources not only complement the existing byway corridor, but also provide a unique solitude and beauty not often found elsewhere in the region.

The Indian River Lagoon National Scenic Byway Coalition also partnered with the Eau Gallie Arts District in 2014 to build an informational kiosk in the City of Melbourne. The kiosk provides byway information to travelers, and also information about local businesses to residents and visitors alike.

www.indianriverlagoonbyway.com

J.C. Penney Memorial Scenic Highway

What this three-mile scenic highway lacks in distance, byway supporters make up for in enthusiasm! The J.C. Penney Memorial Scenic Highway organization works in close partnership with the Town of Penney Farms and the Penney Retirement Community to pool and maximize resources. In 2014, they updated the byway’s website and helped renovate the town’s playground. In October, they also held the area’s first-ever 5K run. By partnering with a Jacksonville running club, they were able to attract one hundred twenty-five runners to the event who were treated to fresh-baked muffins at the race finish!

Florida Senate District(s): 7
Florida House of Representatives District(s): 19

Martin Grade Scenic Highway

The Martin Grade Scenic Highway is Florida’s twenty-fifth and newest Scenic Highway. Just half an hour west of Stuart lies this beautiful road that time seems to have forgotten. Officially, it is the Martin Highway, County Road 714, but the locals simply call it “The Grade.”

This historic twelve-mile road is shaded by a canopy of hundred-year-old oaks and surrounded by pastures, groves, swamps, and woods, just as it was when it was carved out of the wilderness by the region’s earliest settlers. It is the shortest distance between the maddening crowds of today’s twenty-first century Florida urban lifestyle and the serene rural existence of an earlier era.

The Martin Grade Scenic Highway is located in western Martin County, between Lake Okeechobee and the Atlantic Ocean. It is approximately two hours from Orlando, Tampa, and Miami, and only one hour from West Palm Beach.

www.martingrade.org

Florida Senate District(s): 21
Florida House of Representatives District(s): 82
Old Florida Heritage Highway

The Paynes Prairie Preserve State Park continues to be a popular stop for visitors on the Old Florida Heritage Highway. The byway organization is currently working in close partnership with the Florida Department of Environmental Protection and Alachua County to renovate the interior and exterior of the visitor center at the Preserve, which hosts approximately twenty-five thousand visitors per year. New interior exhibits will be more hands-on and kid friendly, further enhancing the visitor experience. These renovations are expected to be completed by December 2015.

The Old Florida Heritage Highway’s 2014 Annual Meeting and Fish Fry was once again a very well-attended community event. A new raffle that included homemade jams and jellies was added as a fundraiser this year.

Florida House of Representatives District(s): 20

Ormond Scenic Loop & Trail

Twice a year, the Ormond Scenic Loop & Trail offers professionally guided walks along one of the many trails on the byway. The walks last for about two hours, and focus on native plants, wildlife, and the natural history of the landscape. The walks are free of charge, and the local biologist who leads the tours donates his time to the byway organization.

These guided walks have been an educational program of the Ormond Scenic Loop & Trail since 2008, and many participants are repeat customers! Byway leaders know from participant feedback that these walks are highly educational, and enhance the knowledge and appreciation of the byway and its scenic resources. Participants are generally from the area, but some travel greater distances to enjoy the trails and beautiful canopied roads.

Florida House of Representatives District(s): 24, 25
Scenic Highway Milestones

**Palma Sola Scenic Highway**

The **Palma Sola Scenic Highway** organization is actively engaged in litter cleanup and prevention programs. The entire four-and-a-half-mile length of the scenic highway is assigned to Adopt-A-Highway groups, and five Adopt-A-Shore groups conduct quarterly cleanups coordinated by Keep Manatee Beautiful. These routine volunteer cleanups have resulted in a reduction in the amount of litter collected on an annual basis.

In addition, new aluminum cigarette bins and litter prevention signs were installed at the **Palma Sola Causeway** pavilions and other public beaches on Anna Maria Island. The new cigarette bins replace those originally installed in 2009 as part of a program designed to educate citizens about the environmental impacts of improper disposal of cigarette litter. Data collected before and after the bins have been installed indicates their effectiveness at reducing cigarette litter, which means cleaner trails and beaches for residents and visitors.

**Florida Senate District(s): 26**

**Florida House of Representatives District(s): 71**

The Palma Sola Scenic Highway organization planted geiger trees along the byway for Arbor Day 2014.

**Pensacola Scenic Bluffs Highway**

Old Chimney Park on the **Pensacola Scenic Bluffs Highway** is an important historic resource. During the Civil War, soldiers looted and burned the Hyer-Knowles Planing Mill that once stood on the site as they retreated from Pensacola. The only thing left standing was the chimney, and it still remains today. The **Pensacola Scenic Bluffs Highway Foundation** was instrumental in getting the chimney listed on the National Register of Historic Places and a proclamation ceremony celebrating the designation was held in April 2014.

On the same site, the **Pensacola Scenic Bluffs Highway Foundation** also constructed an interpretive kiosk. Using construction plans borrowed from the successful **Florida Black Bear National Scenic Byway** kiosk program, the Foundation purchased the materials and recruited a local Boy Scout troop to construct the kiosk. Visitors now have access to a detailed history of the sawmill that once stood on the site.

[www.pensacolascenicbluffs.org](http://www.pensacolascenicbluffs.org)

Pensacola Scenic Bluffs Highway Foundation members celebrate accomplishments and welcome new members at the annual meeting and Ice Cream Social.

New aluminum cigarette bins have been installed on the Palma Sola Scenic Highway. Cigarette butts have topped the list in pounds collected at all international Coastal Cleanups since they were added to the data cards in 1990.

The new interpretive kiosk at Old Chimney Park on the Pensacola Scenic Bluffs Highway was constructed by a local Boy Scout Troop.
Scenic Highway Milestones

River of Lakes Heritage Corridor

In 2014, a National Scenic Byways Program Grant was used to complete a collection of new marketing materials for the River of Lakes Heritage Corridor. The centerpiece is a new website that emphasizes the byway’s new tagline, "There's More to Florida." A brochure was also developed, and forty thousand copies printed. To complete the collection, a thirty-minute byway video was produced. In an innovative move, a local county council member negotiated an agreement to play the video on continuous loop in the baggage claim area of the Daytona Beach International Airport, where over half a million passengers pass each year.

The River of Lakes Heritage Corridor HD video loops in an installation at the baggage claim area of the Daytona Beach International Airport.

Scenic Highway 30-A

In January 2014, a five-mile extension was added to Scenic Highway 30-A. The Friends of 30-A believe that the diverse nature and concentration of the natural, historic, and recreational resources along the County Road 393 extension will enhance the overall experience of visiting the byway.

The byway extension was timed to coincide with the update of the byway’s corridor management plan, which also occurred in 2014. Several new initiatives were included in the updated plan, including: hosting visioning meetings with community organizations, citizens, and local governments to review strategies on economic development; encouraging Walton County to continue to enforce native vegetation preservation regulations; and coordinating with the Walton County Planning Department to develop a heritage tree preservation ordinance.

The Choctawhatchee Bay is part of the Gulf Intracoastal Waterway and is located at the northern end of CR 393, Scenic Highway 30-A’s newest extension.
### Suncoast Scenic Parkway

The Suncoast Scenic Parkway was designed to provide a memorable scenic experience for travelers. In an effort to continually maintain this experience, the byway organization supports efforts to expand and enhance the ongoing wildflower planting program and exotic and invasive plant removal. The Suncoast Trail on the west side of the Parkway enables non-motorized travel through this same linear greenway of preserved native vegetation and topography while providing connections to an ever-increasing number of shared-use trails, recreation and nature parks, and other destinations. The Suncoast Scenic Parkway organization also works closely with several community nonprofit organizations like the Cystic Fibrosis Foundation to hold cycling events on the trail.

---

### Scenic Sumter Heritage Byway

In early 2014, the Scenic Sumter Heritage Byway organization held a ribbon-cutting event to celebrate its designation as Florida’s twenty-fourth Scenic Highway. The ceremony was held at Dade Battlefield Historic State Park, and was well attended by state dignitaries, local government representatives, and community members. In a nod to the area’s rich ranching history, the Scenic Sumter Heritage Byway organization chose “Cow Chip Bingo” as a fundraiser at Sumter County’s 2014 “Beef and Boogie Festival.” The enthusiasm and creativity of this byway group was recognized by the Sumter County Chamber of Commerce who awarded them the 2014 Non-Profit of the Year award.

Scenic Highway Milestones

Tamiami Trail – Windows to the Gulf Coast Waters

During 2014, the Tamiami Trail Scenic Highway Committee was primarily focused on improving the overall appearance of the scenic highway. Volunteers worked closely with Manatee County to improve landscape maintenance for a fourteen-block section of the scenic highway, and have advocated for the landscaping of newly-installed pedestrian safety islands. In addition, the Committee completed an assessment of the Florida Scenic Highway signs along the sixty-three-mile route. As a result of this assessment, the committee will make recommendations for relocation of some signs to more appropriate locations. New banner signs were also installed in downtown Bradenton to highlight events and attractions along the scenic highway.

www.mympo.org/tamiami-trail

The Tamiami Trail Scenic Highway Committee partnered with Manatee County to increase landscape maintenance on the byway.

The City of Bradenton and Realize Bradenton lead efforts to install banner signs along the Tamiami Trail Scenic Highway to highlight events and attractions.

The Ridge Scenic Highway

Since 2008, the 39-Mile Scenic Highway Yard Sale has been held on the first Saturday in November along The Ridge Scenic Highway. The event was created to raise community awareness of the scenic highway, and to encourage tourism in the byway’s small towns - and it’s working! Local governments, residents, and other partners work together to promote and staff the event that continues to grow each year. Local business owners report seeing a dramatic increase in business during the yard sale. Many “new” yard-sale customers become repeat customers. The byway organization also launched a new website in 2014, and has been working on increasing its social media presence.

The Ridge Scenic Highway board members, seen here sporting the official “39-Mile Yard Sale” t-shirts, receive high praise from visitors for hosting this well-organized event.

The Crooked Lake Sandhill Trail is in the Babson Park Area of The Ridge Scenic Highway.
William Bartram Scenic & Historic Highway

The William Bartram Scenic & Historic Highway organization completed two important projects aimed at preserving the history of the corridor and the heritage associated with naturalist William Bartram’s travels. The Northwest St. Johns County Historical Study and Architectural Survey traces development of the area from Native American trails into the scenic roadway of today. Data in the study will help inform decisions on issues such as pursuing National Register designation for historic resources.

The second project was the development of a series of lesson plans for the St. Johns County School District based on the history of the region. The lesson plans are beautifully designed and recommended for grades four through eight. Topics include William Bartram’s travels, northeast Florida’s involvement in the Civil War, and life in 1930s St. Johns County. The lesson plans are currently in classrooms and byway leaders are anxiously awaiting feedback from local teachers.

GARRY BALOGH INSPIRING EXCELLENCE AWARD

Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it is the only thing that ever has.

- Margaret Mead

Few people demonstrate a belief in this sentiment better than Garry Balogh. Garry has served as the District Scenic Highway Coordinator for FDOT District Five since the Florida Scenic Highways Program began in 1996. In that twenty years, Garry has been fully engaged with the byway organizations in his district providing his advice and expertise, and literally working side by side with byway volunteers at meetings and events. To say that he goes above and beyond is an understatement. He believes in the organizations he mentors, and believes the work they do will have lasting impacts on the places they love and call home.

In gratitude for his service and anticipation of his retirement in 2015, the Garry Balogh Inspiring Excellence Award was created as the highest honor bestowed by the Florida Scenic Highways Program. The award will recognize the leadership, innovation, stewardship, and inspiring achievements of an individual or organization that have made a significant and lasting impact on one or more scenic highways, scenic highway communities, or the statewide program.
